What's happening in the world today?

Every week we will send out with the ETIOT a "[What's happening in the world today?](#)" sheet. We encourage children to read this together with their adults at home to develop their understanding of current news items and topics for discussion. We have included links to the UN Sustainable Development Goals against each story, which will help the children to see how they can have a positive impact in the wider world.

HANDi App

Our colleagues in Public Health would like to reach local families to share information that can support them with diagnosing and treating a number of common childhood illnesses.

We encourage parents/carers to download the new [NHS HANDi App](#). The app has an easy to use child symptom checker for all types of childhood health conditions and advises on how best to treat them. It's available on Apple and Google stores.
